

"RNB/WB" Perfin Bulletin 273 Pg.10.

JACK BRANDT assumed this was a broken die - he has no covers or cancels - but has the full RNB/WB on a 4d & 5d Machin but as RNB/WD on a 6½p and 8½p Machin. (Ed.- I have a 2d Machin as RNB/WB. Is it only decimal machins which show the 'WD')?
